

**A Powerful,
Versatile Workhorse**
1600 Utility

Made to carry the load, make your work easier and get more out of your ATV

More features than any pull behind trailer! Combine that with the price and it becomes the best value on the market. Four wheel independent suspension keeps the cargo stable, while large 25" tires provide clearance over obstacles. Heavy duty axles give you the capacity for almost 1100 lbs. of cargo. With safety in mind, the 1600 Utility is outfitted with electric brakes for the stopping power you need to keep control of those heavy loads and comes complete with a brake/tail light. Unloading your cargo with the double hinged tailgate and the electric lift is as easy as flipping a switch. Handlebar mounted buttons raise and lower the dump bed. Built for rugged use with powder coated heavy gauge steel.
